

## Product Information Sheet

### Purple Cushhh Aikôna Pain

50ml (15 – 20 drops on tongue or 20ml water twice daily or as required)

Aikôna Pain is beneficial for supportive treatment of aches and pain. Aikôna Pain is for the unpleasant sensory and emotional experience associated with acute tissue damage. Acute pain is felt when specific nerves detect tissue damage and then transmit the information about the damage along the spinal cord to the brain.

## Ingredients

Wild Yam, Turmeric, Devils Claw, Hypoxis, Black Pepper, Birch Tree, Butcher's Broom, Yarrow

Aikôna Pain contains **Wild Yam** which is a natural anti-inflammatory that promotes healing and releases muscle spasms. Traditionally it has been used for rheumatism and female disorders. It contains a chemical called diosgenin that influences the production of several useful hormones such as Estrogen and DHEA. It also contains deoscoretine which helps with the regulation of blood sugar levels. Wild Yam also has antispasmodic properties which reduces muscle spasms.

**Turmeric** is an antioxidant. It is anti-parasitical, relieves arthritic aches, aids circulation and protects the liver. It is best known for its anti-inflammatory properties. It has been proven scientifically that it can improve endothelial function. The endothelial is the thin membrane that covers the inside of the heart and the blood vessels. This membrane plays a key role in regulating blood pressure. As inflammation is linked to tumor growth, turmeric may help in the prevention of cancer. It is very beneficial for the treatment and prevention of Type 2 Diabetes, depression, Alzheimer's, Rheumatoid Arthritis and it also improves skin health.

**Devil's Claw** relieves pain and reduces inflammation. It has been used in Europe since the early 1900's to restore appetite, relieve heartburn and reduce pain and inflammation. In Germany and France it is a well known cure for relieving headaches and lower back pain.

**Hypoxis** is used for immune related illnesses such as arthritis, cancer and HIV/Aids.

Sterols and Sterolins found in the root of Hypoxis enhance immunity.

**Black Pepper** lowers cholesterol levels, benefits brain function and has anti-inflammatory properties.

**Birch Tree** is used for infections of the urinary tract. It promotes kidney, bladder and urethra health.

**Bucher's Broom** improves circulation, reduces inflammation and is traditionally used to treat hemorrhoids and gallstones.

**Yarrow** was traditionally used to treat arthritis, fever, hypertension and is good for wound healing.
