Galangal, Devils Claw, Magnesium, Artemisia Afra, Myrrh,  
Sutherlandia

The liver is the largest solid and extremely active organ in the body with many functions vital to a healthy life. The liver's main function is to filter blood coming from the digestive tract before passing to the rest of the body. This process fights infection by removing toxins, harmful chemicals and bacteria from the blood. Fats, carbohydrates and protein are metabolized by the liver into forms that can be used by the body to provide energy and nutrients. Healthy blood sugar levels are maintained through the storing of glucose to be released during periods of low blood sugar. The liver regulates blood clotting by producing proteins which promote clot formation. Bile is produced by the liver and assist with the digestion process by breaking down fats in the small intestines. The liver also maintains the body's cholesterol balance by processing the excess cholesterol for elimination via the bile.

Liver disorders include Acute Hepatitis (caused by infection), Chronic Hepatitis (Caused by viruses), Cirrhosis (long term inflammation caused by Chronic Hepatitis and alcohol abuse). Liver failure occurs when the liver is not working well enough to perform its functions, eg. manufacturing of bile and ridding the body of harmful substances.

**Cape Aloe**, one of the ingredients of LiverEase, has excellent antioxidant (protect cells from damage), anti-inflammatory (block substances in the body that cause inflammation), and antimicrobial (inhibiting growth of bacteria, viruses and fungi) properties. The anti-inflammatory and anti-oxidant effects of **Ginger**, **Rhubarb**, **Galangal** and **Myrrh** help to protect and strengthen the liver and boost general immunity against liver disease. **Turmeric**, **Magnesium** and **Gentian** flush out harmful toxins (detoxification) and help to reduce toxin levels in the liver and body. **Devils Claw** has anti-inflammatory and analgesic (pain relief) properties. The antibacterial, antiseptic, diuretic effects of *Artemisia afra* assist with the treatment of ailments such as hepatitis, diabetes, jaundice and gall bladder inflammation. **Sutherlandia** has antiviral, anti-bacterial and anti-fungal properties and in addition to combatting liver diseases, will reduce mental and emotional distress or fatigue. The active substance in **Milk Thistle (Silymarin)** is made up of several natural plant chemicals which act as an anti-oxidant and has been used to treat liver disorders for many years
