50ml

Natural Anti-histamine, Supports bile system, Digestive Support, Prevent gall stones and Liver congestion

Ingredients

Barberry, Fumitory, Baldo, Milk Thistle, Devils Claw, Gentian, Yellow Dock

Liver Tonic is a tincture that combines different natural ingredients to promote liver health. It protects against common ailments associated with liver dysfunction.

Liver Tonic supports the bile system function. It also supports the digestive system and helps in the prevention of gall stones. It functions as a natural anti-histamine and is a preventative measure for liver congestion.

Liver Tonic contains **Barberry** that has been traditionally used for gall stones, jaundice, treatment of malaria patients and the prevention of liver congestion. Barberry contains berberine which inhibits the growth of bacteria and makes the immune system stronger. It is excellent for fighting and preventing infections because it fights off micro-organisms that can make you sick. **Bolbo** is specific for gallbladder problems such as stones and inflammation. It is also used for mild GI spasms, achy joints (rheumatism), bladder infections, liver dysfunction and gonorrhoea. It increases urine flow to rid the body of excess fluids, reduces anxiety and increases bile flow. **Milk Thistle** protects the liver and kidneys from toxins and free radical damage. Studies have shown that it improves liver function. Traditionally it has been used to treat patients with Alzheimer's and Parkinson's disease. The anti-inflammatory and antioxidant properties indicate that it will help with brain function. Milk Thistle promotes the production of the hormone prolactin which is the milk producing hormone in lactating mothers. It also helps with acne because of the antioxidant and anti-inflammatory properties. **Devil's Claw** relieves pain and reduces inflammation. It has been used since the early 1900's to restore appetite, relieve heartburn and reduce pain and inflammation. In Germany and France it is commonly used for relieving headaches and lower back pain. **Gentian** aids digestion and stimulates appetite. It is used for digestive problems such as loss of appetite, intestinal gas, diarrhoea, gastritis, heartburn and vomiting. People use Gentian to prevent muscle spasms, treat parasitic worms, start menstrual periods and is a germ killer. **Yellow Dock** is used for pain and swelling caused by inflammation in the nasal passage and the respiratory tract. A high dosage is used as a laxative and a tonic. It is also used to treat bacterial infections and sexually transmitted diseases. Yellow Dock is also sometimes used to treat intestinal infections, fungal infections and for arthritis.
