

Product Information Sheet

Purple Cushhh Lu-Anne Acne Care

50ml (Apply Twice Daily)

Lu-Anne Acne Care helps soothe painful and irritated skin but also unclogs pores and reduces inflammation.

Ingredients

Organic Trace Minerals, Lavender Oil, Castor Oil, Tea Tree Oil

Acne is a condition recognized by skin eruptions on the face, back, chest, neck and shoulders. The most common form of acne is Acne Vulgaris presenting with blackheads, whiteheads and red blemishes on the skin.

In more severe cases (Cystic Acne), there will be clusters of painful, fluid-filled lumps underneath the skin surface. Both conditions could lead to permanent scarring of the skin.

Acne occurs when the hair follicles are blocked with dead skin cells, bacteria and oil. The oil (sebaceous) glands at the base of hair follicles in the skin secrete too much oil (sebum) and cause blemishes such as pimples, blackheads, whiteheads or cysts on the skin.

The condition can develop at any age but is usually associated with teenagers as hormonal imbalances – a common problem during adolescence – can lead to the overproduction of oil.

Acne Cure has anti-bacterial and anti-inflammatory ingredients which are very effective in the treatment of acne.

Organic Trace Minerals - eg. Zinc helps with healing and recovery from acne. **Lavender** kills bacteria and can prevent a breakout by unclogging pores and reducing inflammation. The anti-inflammatory property in **Castor Oil** reduces swelling and puffiness of the skin. **Tea Tree Oil** is effective in combatting an oily skin as well as soothing and relieving painful irritated skin.
