*The product includes dietary fibers

Ingredients

Burdock Root, Acacia Senegal Gum, Acacia Laeta Gum, Acacia Seyal Gum

When a person is being referred to as overweight, the body weight is greater than what is considered normal or healthy for a certain height. Generally being overweight is due to extra body fat, but it may also be due to extra muscle, bone density or water retention. A person who is obese has too much body fat. The most common causes of obesity are overeating and lack of physical activity. When a person carries excess weight it may cause the heart to work harder to send blood to all the cells in the body. Other health problems that could be caused by being overweight include high blood pressure, high cholesterol and high blood sugar. Obesity increases the risk of digestive diseases such as nonalcoholic fatty liver disease, gastro-esophageal reflux disease and gallstones.

The ingredients of Now or Never include Burdock root which is a natural diuretic and help the body to eliminate excess water by stimulating the kidneys and increasing urine output.

Burdock Root is a source of Inulin which has prebiotic (stimulates the growth of healthy bacteria in the digestive system) properties that inhibit growth of harmful bacteria in the intestines, promote bowel movements and improve the function of the immune system. Other properties attributed to Burdock Root are antioxidant (protect cells against damaging effects of free radicals), anti-inflammatory (fight body's response to irritation or injury) and blood sugar lowering (decrease blood glucose and increase insulin level). The

Acacia Senegal Gum, **Acacia Laeta Gum** and **Acacia Seyal** gum are plant based natural fiber that help with weight loss (the fiber prevent overeating because the person keep feeling full), improve digestion and constipation problems (help to move stool through the digestive tract) and lower cholesterol and sugar levels (slows down the absorption of sugar and cholesterol from the digestive tract into the bloodstream). The Acacia Senegal, Laeta and Seyal gum are different grades of dietary fiber derived from the Acacia tree.
