

Product Information Sheet

Purple Cushhh Sinu Relief

30ml

Assists with Blocked Nose, Running Nose, Sneezing and Post Nasal Drip

Ingredients

Sutherlandia, Fulvic Acid, Sea Salt, Apple Cider Vinegar, 1% Nipagin M Sodium

The sinuses are 8 airspaces within the bones of the face. The sinuses are situated at the forehead, on the side of the nose, behind the bridge of the nose and behind the cheekbones. Each sinus cavity is lined with a tissue membrane that secretes mucus. The mucus keeps the respiratory system free of debris such as dust, pollen and germs. If the lining of the sinuses are irritated by smoke, air pollution, allergies or colds and flu, thicker mucus is produced. The sinus opening will become blocked providing a breeding ground for bacteria. Sinusitis is an inflammation or swelling of the lining of the sinuses. The inflammation of the membrane normally occurs because of upper respiratory infection such as colds and flu. The other situations that can lead to sinusitis are allergies (hay fever), inhalation of chemicals and tooth infection. Symptoms such as headaches, pain and tenderness above the sinuses, difficulty to breathe through the nose and post nasal drip can be experienced if sinusitis has developed. There may also be fever, chills and toothache.

The herbal ingredient Sutherlandia in Sinu Relief has anti-viral (suppress the virus ability to reproduce), anti-bacterial (stops growth of bacteria) and anti-fungal (destroys fungi) properties which will reduce fever and chills associated with sinusitis. Fulvic Acid provides the necessary relief of the symptoms associated with nasal congestion and sinusitis, eg. swelling and tenderness. It may also block reactions in the body that cause allergy symptoms such as sneezing and itchy, runny or blocked nose. The use of Sea Salt help to clear out the excess mucus from sinuses and is effective in improving allergy symptoms and shortening the duration of sinus infection. Apple cider Vinegar helps to loosen congestion and makes breathing easier while the body fights off sinusitis infection. Nipagin M Sodium has anti-microbial (kills bacteria, virus and fungi) activity and helps to clear out the mucus and prevents growth of harmful bacteria.
