

## Product Information Sheet

### Purple Cushhh Ursolic Acid

100ml

Best for Fatty Liver Disease, Ursolic Acid increases Skeletal Muscle and Brown Fat and decreases obesity, glucose intolerance and fatty liver disease, Data suggests that Ursolic Acid is a therapeutic agent for Alzheimer's disease.

## Ingredients

Apple Peel, Rosemary Leaf, Wild Mint Leaf, Sage Leaf, Elder Flower, Grapeseed Oil, Origanum Leaf, Basil Leaf, Bill Berry, Rosehip

The liver is the largest organ in the body. The main function of the liver is to filter blood coming from the digestive tract before it passes to the rest of the body. The liver secretes bile which helps to carry waste products from the liver. Fatty liver occurs when there is too much fat build up in the liver cells which cause liver inflammation. The inflammation can damage the liver cells and create scar tissue which may lead to liver failure if not treated. Severe liver scarring is known as cirrhosis.

Ursolic Acid has many pharmacological effects including anti-oxidant (protects cells from damaging effects of free radicals), anti-inflammatory (block substances that cause inflammation), antibacterial (prevent growth or spread of bacteria) and antifungal (combats infections caused by fungus) properties. Due to these activities, Ursolic Acid possess health benefits for the heart, brain, liver, muscles and may aid in preventing and treating chronic disease. Apple Peel is rich in vitamins and minerals. Both the Appel Peel and Rosemary Leaf ingredients in Ursolic Acid have anti-oxidant and anti-inflammatory properties which can help regulate the immune system and also reduce inflammation. In addition Rosemary Leaf is also considered as a cognitive stimulant and can help to improve memory performance and concentration. Both Wild Mint Leaf and Sage Leaf are used to treat digestive disorders. Wild Mint triggers the release of extra bile from the gallbladder which helps the body to digest fat.

Sage assists in keeping infectious bacteria, viruses and fungi at bay due to its antimicrobial property. Sage Leaf is also credited for its assistance with depression, memory loss and Alzheimer's disease. Elder Flower is a diuretic (increased passing of urine) and also has high antioxidant and anti-inflammatory properties which boosts the body's immune system. Grape Seed Oil contains Vitamin E which has high anti-oxidant properties and help to prevent cardiovascular disease. Origanum Leaf is an antibacterial agent which fights infections. It is also loaded with antioxidants which help prevent cell damage. Basil Leaf help to fight inflammation in the body and this activity can help to lower the risk of arthritis, heart disease, kidney conditions and intestinal problems. Bilberries are rich in nutrients and linked to reducing inflammation and lowering blood glucose levels as well as improving heart and brain function. Rosehip has anti-inflammatory and anti-oxidant effects. It supports a healthy immune system and protect against heart disease and diabetes.
