Camu Camu helps strengthen the immune system., supports the skin, bones and muscles. It acts as a powerful antioxidant, it may fight inflammation, improve blood sugar levels, aid with weight loss and promote healthy blood pressure.

Ingredients

Organic Myrciaria Dubia powder

Camu Camu is a berry found in the remote parts of the Amazon Rainforest. This berry is so sour that you wouldn't find it at your local grocers. — However, after thorough investigation and scientific research, WonderNut has discovered the very sweet side of this berry, which in powder form can truly be called one of nature's most powerful supplements; in fact, many have referred to this berry as being a 'super food'.

There is overwhelming support for this sour-tasting berry to be called the powerful food everyone should be eating because of its extraordinary properties, especially its high volume of vitamin C, among other essential nutrients.

WonderNut's Camu Camu Powder product is 100% natural, which means it contains no chemicals or any other pharmaceutical enhancers to activate its powerful, natural agents in your body at a molecular level.
