### Ingredients

Clove, Frankincense, Rosemary, Peppermint, Cinnamon, Eucalyptus, Grape Seed, Lemon, Vetiver & Basil, Vitamin E, Tocopherols (4), Tocotrienals (4)

Lu-Anne DNA Repair Cream is formulated with essential oils and botanical extracts.

**Clove oil** helps in reducing the sagginess of the skin and prevents the appearance of fine lines and wrinkles. It is a powerful anti-aging ingredient used in most cosmetics. It removes the dead skin cells and helps in blood circulation, which indirectly or directly ensures a youthful and radiant looking skin. With powerful anti-inflammatory properties, **Frankincense Oil** is an effective natural remedy to calm the complexion. For irritated or damaged skin, Frankincense Oil restores the epidermis and calms affected areas. For sunburn, rosacea or breakouts, this healing element soothes and nourishes the skin. **Rosemary Oil** has anti-bacterial and anti-inflammatory properties help battle acne. It helps reduce the appearance of blemishes and can be used to lighten stretch marks. It soothes skin irritation caused by dermatitis and eczema. It doubles as an astringent to soothe skin. **Peppermint oil** naturally cleanses the skin and has antiseptic and antibacterial properties. Due to its antimicrobial properties, peppermint oil may help reduce levels of acne causing bacteria on the skin to help treat pimples. **Cinnamon Oil** is a beneficial ingredient for a natural face wash intended to enhance skin health by reducing inflammation, redness, and swelling while also eliminating harmful bacteria, preventing acne, and soothing infections. **Eucalyptus Oil** an effective natural moisturizer, while it's anti-inflammatory compounds can treat skin issues such as acne and eczema. Because eucalyptus essential oil is antiseptic and antibacterial, it helps cleanse the epidermis of impurities that contribute to acne breakouts. The benefit of the ingredient **Grapeseed Oil** for the skin is that fact that it helps to seal the moisture in the skin and treats dryness. An additional benefit of Grapeseed Oil is helping to reduce the breakdown of collagen (the main structural protein found in the skin and connective tissues) in the skin. **Lemon Oil** has antioxidant (protects the cells in skin from damage), astringent (helps to clean and contract the skin cells), antiseptic (stops or slows down the growth of disease causing micro-organisms) and detoxifying properties. The anti-inflammatory properties in **Vetiver & Basil Oil** help to ward off skin irritation and small wounds, i.e. cracked open skin fissures on heels. It also helps to remove dirt and impurities from the pores of the skin. **Vitamin E** is a generic term for a group of chemical compounds called Tocopherols (anti-oxidant and protects cells from damage) and Tocotrienols (prevent skin ageing by stimulating collagen production and increasing skin elasticity). Regular use of the Vitamin E Oil will moisturize and nourish the skin. It strengthens the skin barrier, giving a healthy glow and smooth appearance.
