

Food4Hope & Purple Cushhh VascuFlow

VasQFlow is a supplement designed primarily to support heart health, healthy blood circulation, and nitric oxide production.

Nitric oxide (NO) is a molecule in the body that helps relax and dilate blood vessels, improving blood flow. As people age, or due to lifestyle factors, the body's ability to make sufficient nitric oxide may decline. VasQFlow is formulated to help boost that process

Ingredients

Ginkgo biloba, Garlic powder, Vitamin C, Cayenne pepper, Curcumin, Beetroot powder.

Key characteristics and uses of VascuFlow:

Support healthy blood circulation — making it easier for oxygen and nutrients to reach organs and extremities.

Help maintain healthy blood pressure levels.

Improve nitric oxide levels in the body, which helps with vascular dilation and overall cardiovascular function.

Reduce symptoms like cold hands or feet, which can result from poor circulation.

Provide antioxidant support via several natural extracts, which may help protect vascular health.
